WILD COUNTRY

Anyone can buy 7075 alloy; anyone can pick up a phone and buy some nuts or biners from a whole raft of producers in the Eastern Bloc or the Far East... and some people do, clogging up the shelves of outdoor stores with their 'exotic' new brands...

So why choose one brand over another? Why stop to pore over the options in the local store? What makes it worth investing that little bit more in a Wild Country biner or harness? In fact what makes Wild Country so special?

The difference is in the quality, the testing, and the rigorous adherence to the highest safety standards – our own, set well beyond the basic Euro norms – which made Wild Country one of the first climbing hardware manufacturers to gain the internationally recognised ISO 9001:2000 status.

This is a quality standard, which ensures that from product design, to testing, to traceability, our systems are absolutely rigorous. This system of work is regularly inspected and tested by independent auditors.

These inspections make sure what we claim is true, is!

So when we say we proof load 100% of incoming biners we really do it. When we say we 100% inspect every harness and sling that passes through our hands, we really do it.

Above all this, they make sure that the way we work places safety and quality at the core of everything we do. And this applies whether we make the product in our Peak District factory, or in one of our partners' plants, either in the UK or abroad.

Anyone can pick up a phone; not anyone can know that what they have ordered will be safe, or how to find out if it is.

In the end that's because not everyone has 30 years experience of designing, building and testing some of the most revolutionary and respected products in the outdoor world.

Wild Country does.

WILD
COUNTRY

NEW HELMETS

Modern climbing is all about movement, on rock, on ice or both, and across the seasons; adapting skills to surroundings and circumstances to make the most of changing conditions. And unequivocally a top quality helmet now needs to do the same. Enter the new Alpine Shield – the first true modular design that adapts as you do. So from E5 to 5.12, Scottish V to WI5, a simple and quick conversion scales the protection you need to meet the challenge you choose.

Once again Wild Country enters the field with an innovative approach that moves the game on – challenging perceptions of what can be done and how it is done, to the benefit of climbers and climbing.

NEW ALPINE SHIELD HELMET

The awesome new **Alpine Shield** takes an innovative and stylish approach to creating the ultimate in adaptability and the perfect 'year round' helmet.

This modular design adopts a 'two-in-one' approach, combining a lightweight, in-mould EPS/Polycarbonate helmet with an exclusive 'Alpine Shield' cover that can be quickly attached to give enhanced protection.

Worn uncovered, this helmet is perfect for all round cragging; supremely light and with an optimal fit via quick-click volume adjustment, soft EVA pads and a super secure, quick release chin strap.

Worn covered, by adding the bonus Alpine Shield shell – providing 30% extra stone and icefall protection – it goes further than any other helmet of its type can go. Meaning this fully featured model becomes a true winter lid and one of the lightest choices around.

Simple to switch around, easy to fit and wear, the Alpine Shield is the first helmet with this modular capability – so from gritstone games to winter workouts it converts from best in class to a class of its own.

Features: Lightweight best in class EPS/Polycarb helmet, Exclusive free extra 'Alpine Shield' polycarbonate cover (up to 30% enhanced stonefall protection with cover), Simple 'coin-slot' alpine shield adjustment, Quik-Click- glove friendly adjustable sizing, Adjustable EVA cushioned, head hugging inner pads, Nexus Acetal (better in low temp) quick release chin strap buckle, Smooth 16mm nylon chin strap, 4 Torch grips (acetal – better in low temps), Foil covered vents, Hood friendly sizing for winter wear, 3 Stylish colour choices, Emergency inner sticker, Free storage bag, One size.

CE EN 12492 / UIAA 106 / 3 Sigma rated.

Product Code: Silver: 36ALPSHLDS,
Black: 36ALPSHLDBLK, Coloured: 36ALPSHLDC.

**alpine
shield**

NEW 360 HELMET

Durable, stylish and super safe the 360 is an exceptional polycarbonate helmet built with style and the safety credentials to blow the opposition away.

Created to act as a cross-season all rounder the 360 is a reliable and fully featured model that will be at home on first forays out to longer expeditions away. Built with safety in mind the 360's testing pedigree is its strength. Optimal shaping, optimal material use and top impact resistance mean great test results, including a best in class side impact result. This is due to Wild Country's decision to use more EPS than other helmets and to extend the EPS further down the sides and back of the lid. This makes impacts from a swinging fall safer, adding more plusses to an already secure design.

However, this strength is not a sacrifice to weight or fit and the 360 remains a lightweight choice. Internally, it adjusts via a glove friendly 'dial-system', cinches and releases simply and sits comfortably on adjustable, cushioned EVA pads.

A safety conscious go anywhere, do anything, all rounder with a strong sense of style, an excellent fit and a price tag that protects the wallet; the 360 redefines polycarbonate performance.

Features: Lightweight best in class Polycarb/Eps helmet, Quik-Dial glove friendly adjustable sizing, Adjustable EVA cushioned, head hugging inner pads, Nexus Acetal (better in low temp) quick release chin strap buckle, Smooth 16mm nylon chin strap, 4 Torch grips (acetal – better in low temps), Hood friendly sizing for winter wear, 3 Stylish colour choices, Emergency inner sticker, Free storage bag, One size.

CE / UIAA / 3 Sigma rated.

Product Code: White: 36WC360W,
Blue: 36WC360B, Red: 36WC360R.

360°

LIGHTER IS RIGHTER... IT'S OFFICIAL!!

For 2009 the Wild Country boffins have been shaving the dies further to create an even more amazing range. So now there's not only a new hyperlight 27 gram biner, the **Astro**, as well as a new 33gram full size biner the **Nitro** but to top it all we can reveal the worlds lightest screwgate biner the 40 gram **Neon Screwgate**.

NEW ASTRO

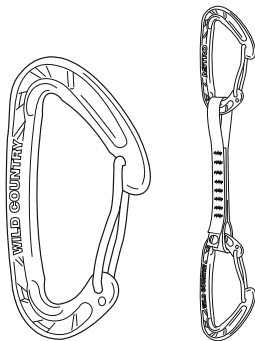

At less than an ounce per unit and with the stylish and strong 'I beam' technology, the new Astro provides an amazing platform for the 2009 Wild Country range to sit on.

Like a miniature of the original, amazing Helium, the Astro's technology combines plenty of strength with a definitive design that keeps up the downward momentum of weight loss. Small, but designed to sit perfectly in the hand, its size belies the ease of use. Built with our easy clip 'Tech-wire' wiregate and skinny, safe, hooded nose that makes it perfect for super slick clipping, it's not hard to see why it handles so well.

The Astro is a hyperlight, high performance biner that weighs less to give more and Wild Country's lightest biner + QD. QDs come on 10mm dyneema with Tadpole. Sets of Biners / Quickdraws available.

Features: Hyperlight, Techwire gate, I Beam back, Skinny hooded nose, Hot forged, High gate open strength.

Product Code: 13ASTROA.

3 Sigma Rated, UIAA 121, CE EN 12275, 7075 Alloy.

NEW NEON KEYLOCK SCREWGATE

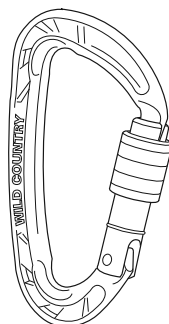

No ifs no buts, and no way to ignore this, the Neon screw is the **worlds lightest screwgate** and finally makes a screwgate close to being as light as many modern snaps.

Achieved using a combination of the proven I beam technology and a little lateral thinking, the Neon Screwgate gives safety a boost allowing more screwgates to be carried without a weight penalty. Add to this a smooth Keylock nose and a usable gate clearance, it makes clipping and unclipping no toil – even with gloves. And as with all the Wild Country screws the Neon's screwgate is strong enough to resist inward pressure as well adding an extra safety dimension.

An amazing step forward and a true weight breakthrough, the Neon screw finally ditches the penalty of weight from a screwgate – and with its keylock nose it makes for safer climbing with no catch!!

Features: Hyperlight, I Beam back, High strength screwgate, Hot forged, High gate open strength.

Product Code: 13NEONSG.

3 Sigma Rated, UIAA 121, CE EN 12275, 7075 Alloy.

NEW NITRO TECHWIRE

The Helium is an exceptional biner... everyone tells us so! It feels great in the hand, clips superbly, and is still the world's lightest true full size biner. In fact maybe the only criticism is that it's incredible patented 'no-hook' nose makes its production an expensive business.

So the Nitro is a solution to that, it's a Helium with a skinny hooded nose that's easier to produce and comes at a way better price! So you do the math... an easy clipping, full size, great handling biner at an awesome price – equals a bargain just waiting to be snapped up.

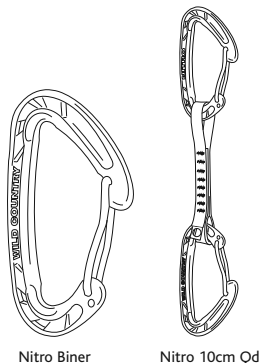

QD comes on 10mm dyneema with Tadpole. Sets of Biners / Quickdraws available.

Features: True full size superlight biner, Techwire gate, I Beam back, Skinny hooded nose, Hot forged, High gate open strength.

Product Code: 13NITROA.

Nitro Biner

Nitro 10cm Qd

XENON LITE

Sometimes less is more. And sometimes more is less.

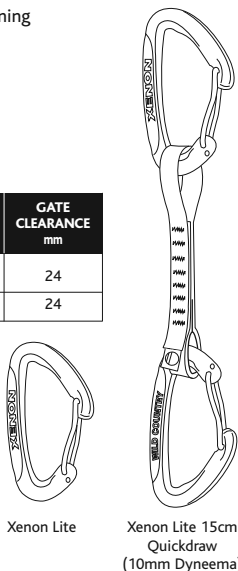

Case in point the awesome new Xenon Lite. Less weight in each biner and each quickdraw means more chance you'll reach the top. Conversely you could carry more Xenon Lites for the same weight, meaning when the chips are down you may just have the extra clip you need. Either way you win.

Features wise, this hot forged mini-marvel has a small neat nose, is hooded to protect the gate and shares the subtle shaping as its big brother. QD comes on 10mm dyneema with our new Tadpole. Sets of Biners / Quickdraws available

Features: Ultralite biner, Hooded nose, I beam back, Hot forged, Tech-wire gate.

HELIUM CLEAN-WIRE

The worlds most technically advanced and lightest true full size, wiregate biner has been designed for elite climbers everywhere, and still gets the best reviews – 4 years on! The Helium's unparalleled combination of extreme lightweight, high strength and 'Clean-wire' nose make it the ultimate on-sighting biner. The Helium QD comes in three lengths and with it's 10mm Dyneema sling is probably the most advanced and lightest on-sighting draw in the world. QD comes with our Tadpole. Sets of Biners / Quickdraws available.

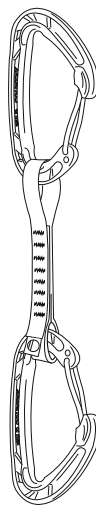

Features: Patented 'Clean-wire' nose, 'I' beam back, Hot forged, High gate open strength, Unique 'Flat-Wire' gate.

XENON

The full size 'daddy' Xenon is that mythic 'great all-rounder' biner and was designed to be lighter and stronger than most other fullsize biners around. With a narrow wire gate and a skinny hooded nose the Xenon clips smoothly, even in the most awkward of places, racks fantastically and is well protected – giving maximum security with the minimum of fuss and weight. QD comes with Tadpole. Sets of Biners / Quickdraws available.

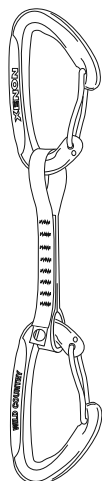

Features: Hooded gate, 'I' beam back, Hot forged, High gate open strength.

OXYGEN KEYLOCK

A stalwart workhorse the Keylock Oxygen is a continuing success. Lighter, more shapely and with our new Keylock nose, this is great all round biner that keeps a firm re-assuring feel for those who don't want to go too far down the anorexic wiregate route. The solid quickdraw hangs great for redpoints and projects. Comes in bent & straightgate. QD is on 12mm Dyneema and comes with our Tadpole

TITAN II KEYLOCK

A superb all rounder, the Titan II, (based on the original bestselling screwgate shape) is a beauty; big, deep, with a wide opening and an affinity to clipping smoothly with its Keylock nose. Plenty of room for racking gear, tying knots and definitely our best biner for big paws! QD is on 12mm dyneema & comes with our Tadpole.

Features: Wide gate clearance, Keylock nose, Hot forged, Bent and straight gate.

TITAN II KEYLOCK SCREWGATE

Hot forged, slicker, lighter and with our Keylock nose, the classic Titan screw has the lines a supermodel would be proud of. A great screwgate, and a best-seller, re-designed & making a stronger case to be the screw to carry at all times and for all-purposes. And for extra security the super-safe 7075 Alloy thimble resists gate inward loading.

NEW BOULDER SET

It's bargain time... if you're just hitting the long road to bouldering enlightenment then we think you'll appreciate this perfectly formed set of gear which includes:

Boulder Bag – our new large flat bottomed chalk sac.

Boulder Brush – A thin neat double ended nylon brush.

Pure Chalk 350gram Bag – our big bulging re-sealable bag.

Tape – a bonus item of thin, sticky, finger protecting stuff.

Product Code: 29CBCHKBLDRSET.

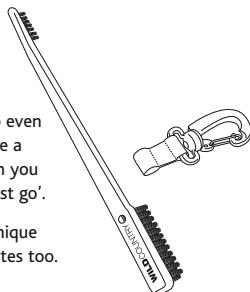

NEW BOULDER BRUSH

A thin, tough and neat double ended brush. Designed to scrub even the smallest of edges to provide a clean, true, smeg free pull when you really need it on that crucial 'last go'.

Brush comes with a free and unique harness clip for carrying on routes too.

Weight 15grams.

Product Code: 19BLDRBRUSH.

Boulder Brush with bonus clip

WILD COUNTRY PURE CHALK

There's more to chalk than meets the eye: and with the blending, baking, crushing and forming involved sometimes it can seem more like distilling whisky than making a simple white powder. But remembering that the best whisky is usually the purest we figured that Wild Country Chalk would be better that way too... Pure... Hence the name.

So with no additives, drying agents or other nasties to ruin your skin or the rock Pure Chalk will keep your hands clean and dry and thus keeping your head clearer in even the hottest spots...

BMC Bonus – As a bonus you can help keep our climbing areas in better shape as 2% of all the turnover on all chalk sold goes to the British Mountaineering Council to help the Crag Care Fund keep our areas open, clean and accessible.

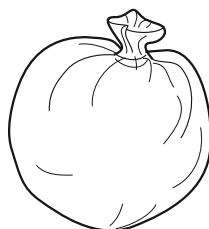

NEW PURE CHALK BALL – 60GRAMS

Sized to slip unobtrusively into your powder pouch our chalk ball is a super tough one, and is filled with 60 grams of our exclusive Pure Chalk formula. The stretched material wrapper lets out enough chalk each time to coat the fingers well, but without losing too much powder, and should last a good long time. And as a bonus it's the perfect size for throwing at mickey taking mates – after you've crashed and burned on another send – without causing them too much damage!!!

Weight 70grams.

Product Code: 29CBCHKBALL.

Pure Chalk Ball
60gram

NEW PURE CHALK BLOCK – 58GRAMS

The original chalk delivery system is now available with 58grams of Wild Country Pure Chalk. Buying a block and breaking it lets you decide how you use it... big chunks, little chunks or smooth balls.

Available as single block or an 8 block box.

Product Code:

Box 29CBCHKBOX.

Pure Chalk Block 58grams

NEW PURE CHALK 350GRAM BAG

Blended, baked, formed, then crushed to our specifications this is the best value bag on the market with it's mega sized 350grams meaning it should last through a whole bunch of tries on even the most hardcore days out.

Our bag's re-sealable so it don't spill and mess your stuff and recyclable so it don't mess anyone else's either.

Product Code: 29CBCHKPACK.

Pure Chalk
350gram bag

SYNCRO RANGE

The Syncro is the stalwart of the Wild Country range and with an Ultralite version available too these double buckled comfort monsters offer something that’s unavailable elsewhere – the perfect centring of the harness whatever the clothing worn or the load carried.

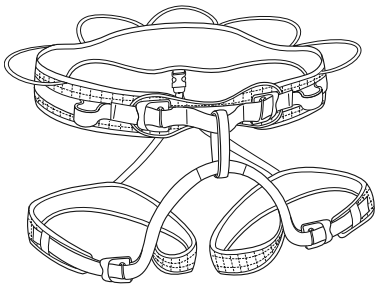

With Wild Country’s Ziplock buckles’ slick and simple functionality this means that increased comfort and easy access to your gear is a guarantee – making these the highest pedigree all rounder harnesses around.

SYNCRO ULTRALITE

Going down a storm, this super-tweaked version has proven to deliver more performance in the most extreme conditions.

A lightweight, super-ergo belt design puts padding exactly where needed and is covered by a high strength ripstop fabric outer for a sheer strong finish. Inside a DWR (durable water resistant) treated, stretch fabric inner, helps keep water out – essential in winter. The waistbelt keeps our classic, centred, double buckle fit while shedding weight by utilising new alloy ziplock buckles and 20mm webbing. Five well positioned gear loops and two dedicated ice-screw holders give ample carrying capacity.

Features: ‘Super-Ergo’ belt, Ripstop fabric outer, DWR treated inner, 20mm waistbelt webbing, Two ice screw holders, 5 gear loops, 25kn belay loop, Wear indicator, Elasticated leg loops, Single clip off point, Mesh carry bag.

ELITE RANGE

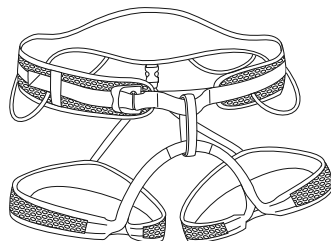

With sales in 2008 that certainly belie that fact that everyone's just bouldering, the Elite Range has proved that combining cutting edge design with comfort was a great way to go. And with the Elite range these twin ambitions are married to create truly stunning, original harnesses that prove that style fit and function can be mixed to make even the most jaded take notice.

ELITE ULTRALITE

Elite Ultralite – Created to become our 'piece de resistance' for the avid sports climber or traditionalist who really wants to go lightweight it seems that the Elite Ultralite really hit the spot.

Taking a lead from the previous Elite models but slimmed and trimmed of any excess it becomes the choice for your hardest routes and redpoints. With a more radical shaping, this harness was designed for movement and sports a 'super-ergo' belt that's been carved to allow an unprecedented flex and feel. Add to this 4 gear loops, a radical 10mm dyneema belay loop, as well as a stylish finish that really stands out and its easy to see why it became the latest 'big thing'.

Features: 'Super-Ergo' belt, 10mm Dyneema Belay loop, 20mm Waistbelt webbing, 4 gear loops, 25kn belay loop, Wear indicator, Elasticated leg loops, Single clip off point.

VISION HARNESSES

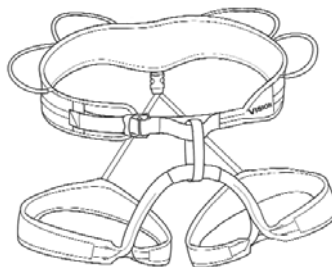

The Vision harness range is stylish, light and neat and has been our bestselling range from day one. Developed with Wild Country's 'binding loaded' waistbelt and Ziplock buckles throughout they perform with a fit, function and value that marks them out from the crowd. And with models for experts as well as to get beginners up and running it's no wonder that the range keeps going from strength to strength.

VISION UNISEX

Easy to fit, and comfortable to wear, the lithe, cool Vision has proved to be a great harness. This bestseller is a light, trimmed down model which sports our Ziplock buckle for the slickest, safest, fastening and makes a great all round rig.

The belt has our 'batwing' shape to hug in the right places while the fixed legs are elasticated with enough 'give' to fit most shapes and sizes. Finished with a host of features including a Wear Indicator and 25kN Belay loop it's another Wild Country winner.

Features: Ziplock waist buckle, 'Batwing Belt' shaping, Elasticated leg loops, Four gear loops, 25kN Belay loop, Single point drop seat, Mesh carry bag, Colour: Red.

Vision Adjustable Men's

Batwing Belt

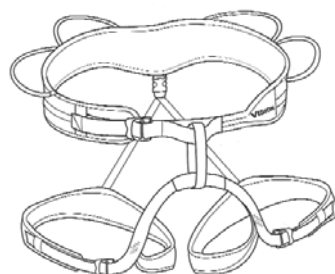

VISION ADJUSTABLE WOMEN'S

Our women's model is designed not only to complement the men's but also to adapt more rigorously to the female form to provide a closer fit than a unisex model can. A longer rise and adapted waistbelt to leg loop ratio make this possible. Add to this our slick Ziplock legs and waist and you have a neat package that has proved irresistibly popular. NOTE: The XS sizes down to a tiny 25"/64cm waist – perfect for teens to grow up with.

Features: Ziplock waist and leg loops, Re-shaped for women, 'Batwing Belt' shaping, Four gear loops, 25kN Belay loop, Single point drop seat, Mesh carry bag. Colour: Orange.

NEW CLASSIC HARNESS

A proven design, the Wild country Classic is a starter, gym or group harness that's hard to better. Its 'over the top' tie in point allows quick and easy clipping in and unclipping either using a traditional knot or a screwgate and its amazingly wide adjustability fits almost anyone. The Ziplock buckles on the legs and waist are easy to adjust and give a 'never-undone' security that breeds confidence.

Features: Enormous fit range, High visibility 'over the top' tie in, Ziplock buckles, Single gear rack.

Classic Ziplock Harness

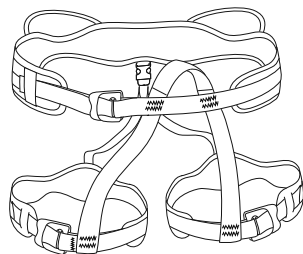

VISION GYM

Taking it's lead from the full spec Visions' styling and shape, this is a neat and functional model which is designed for those hitting the climbing wall for the first time. A simple 'over the top' tie in gives easy attachment while Ziplock buckles throughout have a strength, security and slickness that's hard to beat. And with two gear loops it will cover first moves into leading as well!!

Features: Simple fitting and adjustment, 'Floating' pads for perfect fit, Ziplock buckles.

ZEROS

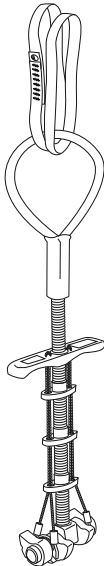

A miniature miracle of modern engineering, and still getting great reviews as well as gasps of astonishment, the range and usefulness of Zeros has to be seen and experienced to be believed.

From the diminutive Zero 1 – still the smallest cam ever made – upwards, the many unique features of Zeros combine with their unrivalled flexibility to make sure they are a keystone of Wild Country's range. The longer stem of sizes 3-6 makes them easier to place and remove than many rival cams and the large trigger ensures even gloved use while aiding is no problem.

Features: Direct Loading Axle, Camstops, Guided Triggers, Flexistem, Original 13.75 Cam angle, Light 10mm Dyn Extendable Sling.

TECHNICAL FRIENDS "BONUS FREE BINER IN 2008/9"

'If it ain't broke... don't fix it!' – While plenty of companies are rushing out copies, the original Friends remain a true 'tried and tested' product. Tweaked and refined over 30 years the current incarnations are still the backbone of the majority of climbers' racks today. By their nature light, ergonomic and intuitive to use the classic Technical Friend range has many attributes that are hard to match, including: Unrivalled coverage from 10mm to 197mm; Proven 13.75 holding power (even in flares), and a placement stability that simply oozes confidence.

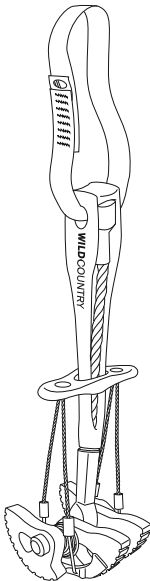

So when you're out there looking it's great to know there's still a benchmark product with enough crag time logged that you can rely on them, every time and at all times. And with a free racking biner with each one you know that they give great value too.

*All individual units sold up to size 4. Sets available 0.5, 1.5, 2.5 / 1, 2, 3.

Features: Original 13.75 camming angle, Anodised Colour Coding, Light Single NiCroMo Axle, Camstops, Zytel Nylon Sheath, 12mm Dyneema sling.

SUPERLIGHT ROCKS

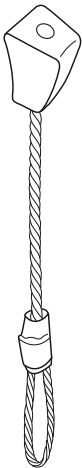

Superlights are now known as essential kit – and maybe should be called *Superlative Rocks* due to the plaudits heaped on them from reviewers from every corner of the globe. Slim, light, flexible, and supremely fiddleable in tight spots, these single wired beauties seem to push all the buttons as the perfect tool to complete any serious rack.

In six sizes, curved and with tapered sides, they give any rack more bite for very, very little weight. Set available 1-6.

Features: 7075 alloy for easier removal, Single wire, colour coded anodising, Tapered sides.

Rock On Wire 3

MINI ROCKS

Small and really useful in extremis, the Mini Rocks combine a neat, precise shape with a positive fit. Flat sided due to their size, they are engineered to make the most out of very little metal. Neat touches include a ‘sunken-wire’ head which provides protection and strength where the wire’s at its weakest and fine rumbling which gives a super smooth finish. Four sizes all below a Rock 1 wide give a range of placement options.

Mini Rock 0.25

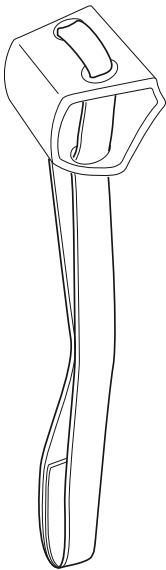

ROCKCENTRICS

A eureka moment and the Rockcentric was born. Combining the best ideas behind the clunky old hexentric with modern shaping and materials might not seem like genius but ask the hordes of climbers who've been snapping them up since day one and they'd probably disagree. Brilliantly light, with a range of placement options that make them so easy to use and a flexible dyneema sling that helps keep 'em firmly wedged once placed.

Features: 14kn Dyneema sling, 4 Placement options, Side tapers, Lightweight, Great for winter.

CLASSIC ROCKS

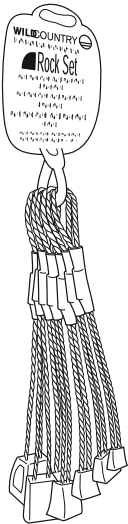

Kept alive by popular demand, and a price that helps out too – the Classic Rocks are available in a set of 1-10 only and are a perfect beginners' tool. They keep the shape, curve and solidity of the original unmodified Rock design and come unanodised. A great introduction to the Wild Country range.

Features: The original curved nut, in set of 1-10 only.

6082 T6 Alloy, 3 Sigma tested, CE 12270:1998, UIAA 122

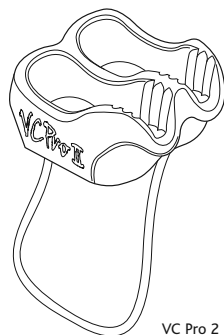

VC PRO 2

With an easy, organic shape and intuitive feel the VC Pro 2 has been a success since its launch and is recognised as one of the leaders on thin ropes. And it has two great attributes to make it so: Firstly it has a smooth finish for fatter cords with a flattened out bottom, which keeps the biner a bit further away and decreases grab. Secondly to give even more bite on ever-decreasing diameter skinny ropes, the V slots are deep, accepting even the thinnest ropes to give a firmer grip.

A great device, for indoor or out, that should stay at the top of the heap for a while yet. Set with Synergy screwgate available.

PRODUCT	PRODUCT CODE	COLOUR	ROPE TYPE mm	WEIGHT gm	WEIGHT oz
VC Pro 2	14VCPRO2	Silver/Orange/Blue	8.0-11	79	2.79

VC Pro 2

VC – VARIABLE CONTROLLER

With slightly widened slots for give extra performance on single ropes the VC is a less specialised tool to complement the arrival of the VC Pro 2. This gives it an all round appeal and means it works better for sports and gyms as well as still being a reliable partner for traditional double rope technique and abseiling. Set with Synergy HMS Screwgate available.

ROPEMAN 1 & 2

Best sellers from day one the Ropeman 1 and 2 have become the ubiquitous tools for a wide range of mountaineering and cragging activities. From prussiking to pulleys and mouflage the list of uses and adaptations for these small but perfectly formed devices goes on and on.

Note: The Ropeman 1 features an alloy cam and is for 10 to 11mm ropes only while the Ropeman II has a more refined stainless steel cam which operates better on thinner ropes down to 8.5mm.

SRC – SINGLE ROPE CONTROLLER

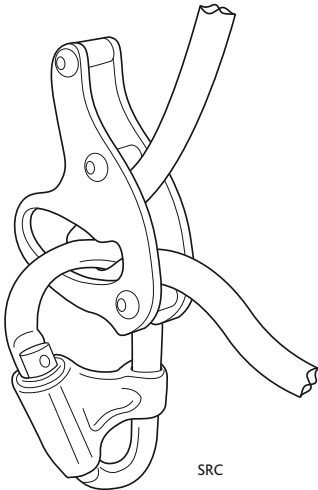

The Single Rope Controller is Wild Country's super safe belay device which works like an 'auto-lock' but with a very important difference – it has a much more dynamic action leading to a lower impact force and a much softer fall.

The key here is that this puts less strain on the device, the belayer and, most of all, the falling climber. Simple to use and very fast paying out in a redpoint situation it's also a great device for safe starting out – top roping and for first leads.

Refined and easy to use and with stainless steel pins for long life in group or centre situations.

EXPRESS SLINGS 'TADPOLE' 10mm & 12mm

For sale singly and also supplied with all our quickdraws the 10mm and 12mm Dyneema Express slings are sewn through and sport a bonus feature the 'Tadpole'.

The 'Tadpole' is a neat rubber ring sewn into the sling at the bottom, or rope-clipping end, that grips the biner, helping to keep it orientated correctly at all times. Conversely on these 'dogbone' slings the top end of the 'draw' remains loose so the biner there can be rotated for safety.

10mm DYNEEMA

The amazingly light and brilliantly flexible 10mm Dyneema slings are now our best selling width – and provide the 'cutting edge' to any rack where weight is at premium. Weighing in at only 16gms a metre but still with 22kn 3 Sigma rated breaking strain it's obvious we're looking at the lightweight champion.

SYNCRO GEAR SLING

A feature packed gear sling which gives an enormous carrying capacity allied to a Ziplock adjustment system for speed and reliability. Harness quality die cut foam gives the shoulder piece a high weight tolerance and comfort when fully laden. An essential product for big wallers or adventure climbers with a penchant for gear. New for 2009 detachable 'chest-loop' for optional security when fully laden.

Note: Designed for carrying gear only, not to be used as a sling.

PRO-KEY

A radical update makes this tool more adaptable and easier to use. A wire gate means a direct clip to the harness, while a folded top gives a bigger surface area to allow a firmer (less painful) push with the palm and large holes keep the weight down. And finally, the tip of the Pro-Key is precision ground to give it the most accurate nose for removal even in tiny slots.

The Pro Key can also be bought with an optional, removable, extendable, leash and clip which means you're safe from dropping it in tight spots.

Colour: Silver.

Product Codes: 14PROKEY – 14PROKEYLEASH.

Pro Key with optional leash

PETIT BLOC CHALK BAG

A crackin' little bag with a simple round shape that fits most hands. The Petit Bloc is a mid size all rounder that's been a best seller for years. Fits chalk ball or loose chalk. Comes in a variety of colours and materials. Bonus: All Wild Country chalk bags come with a free chalk bag belt in 2008/9.

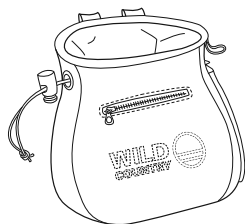

Petit Bloc Chalk Bag

Product Code: 29CBPETIT.

GRAND ILLUSION CHALK BAG

This bag has a zip pouch for your goodies on the front and a toothbrush pocket on the side as well as a finger friendly teardrop shape for easy dipping; making it a stylish replacement for the Grand Bloc. Bonus: All Wild Country chalk bags come with a free chalk bag belt in 2008/9.

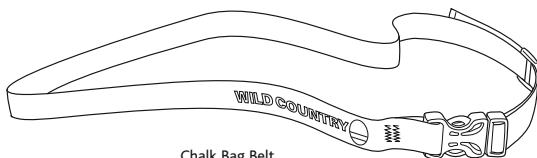

Grand Illusion Chalk Bag

Product Code: 29CBILLUSION.

CHALK BAG BELT

A neat, 20mm webbing belt that fits the Wild Country, and most other chalk bags perfectly. Simple adjustment through a fastex buckle and a great price.

Product Code: 29CBB.

Chalk Bag Belt

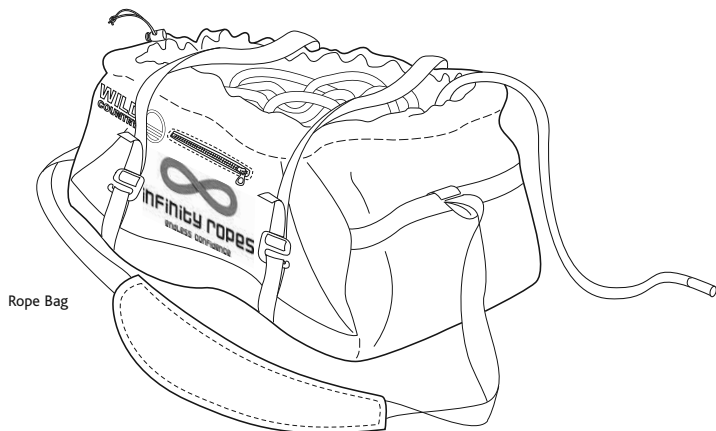

WC ROPE BAG

A classic design, with a roll out tarp and strong easy adjust aluminium buckles, internal tie point and a padded over the shoulder carry loop. Also comes with an internal side foam pad that protects the back or hips while carrying.

Colour: Black, Size: 35 litres, Tarp Size: 135 x 105cm.

Weight: 760gms/26.81oz.

Product Code: 19WCROPE.

Rope Bag

SETS

With their increased range Wild Country packaged sets have proved increasingly popular. Our polypropylene gives stronger packaging, a more distinctive POS environment and better branding. Offered at an average 5% discount the sets are better value for money than individual units: this should mean more sales, more satisfied customers and a higher take per sale.

All sets are now sold on 600 mic recyclable Polyprop header cards.

inFinity ROPES

by **WILDCOUNTRY**

The Infinity Ropes concept came from a challenge set by our mega-experienced climbing team to create a series of ropes which were technically advanced but that were also up to the rigours of 'top-end' climbing. This exacting brief was turned in to a design reality by Wild Country MD Martin Atkinson, and drawing on 8 years spent at one of Europe's biggest rope manufacturers he has created this superb new line. Infinity Ropes feature a number of exciting new developments to make sure that whichever rope you choose and whatever it is put through, you will be using the most tailored and responsive designs on the market today.

SPRINT 9.2mm

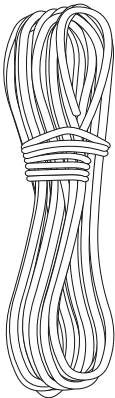

Shaving weight and saving effort; these two aims are inextricably bound together and with our amazing new sub 60gram per metre rope we've done the first to allow you to achieve the second. Thus the new generation of Infinity Ropes starts here, with the Sprint 9.2's superb combination of weight, handling, feel and flexibility allowing an even more confident approach on your hardest pitches. An already refined outer has been trimmed down further for this cord, making it smooth to pay out and great to clip with. These lighter sheath yarns give a finer feel yet still retaining high degree of durability in this 9.2mm rope. At the same time the re-worked 'balanced core' has a lower impact force meaning that if you do take that tumble it won't feel as bad.

Always critical to extreme ascents, the weight of a rope on a long pitch can tip the balance between success and failure – so why not nudge the scales your way and try the slickest Infinity yet.

Features: BCC, DCC, SD

PRODUCT	PRODUCT CODE	WEIGHT gm per m	FALLS	IMPACT FORCE	NON-DRY	DRY	50	60	70
Sprint 9.2 X 50m Dry	18092S50D	52	6	840		X	X	X	X

Sprint 9.2 X 70m Dry	18092S70D	52	6	840		X	X	X	X

Note: Like with all thinner ropes extra care should be taken when belaying. CE EN892, UIAA 101

Sprint 9.2mm

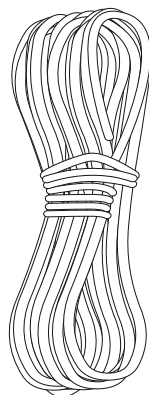

SPRINT 8.4mm & SPRINT 10mm

These cutting edge ropes are characterised by an improved 'feel' and a finer relationship between strength, weight and durability. Lower denier yarns braided on machines with higher carrier count result in a rope that is smoother to handle, more flexible in use, and consequently transmits a lower impact force making a more comfortable fall. Tailored for the expert, and much lighter per metre than the Enduro series their durability holds up well to give ultimate confidence in extreme situations. Sprint ropes are all dry coated.

Features: BCC, DCC, SD.

Sprint 8.4mm 50m Rope

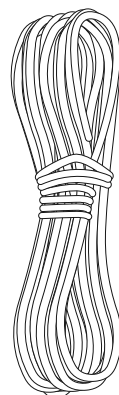

ENDURO / SUPER-ENDURO 9.0mm & 10.5mm

The Enduro range is specifically constructed to be the hardest wearing rope in its class. This is achieved by using heavier denier yarns and a higher than normal ratio of sheath to core yarns, but importantly without sacrificing handling quality. Their price and performance combined with this extra longevity makes them excellent value for money and a super-reliable product. Super-Enduro ropes are dry treated.

Features: USP, BCC, DCC, SD.

CE EN892, UIAA 101

Enduro 9mm 50m Rope

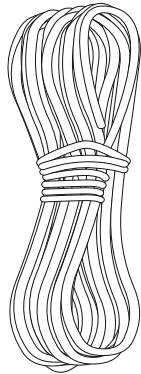

ENDURO 10.5mm NON-DRY

After the success of our dry treated Super-Enduro we realised there were still a lot of people who wanted this diameter of rope but didn't necessarily need the water repellency. The new Enduro 10.5 still provides a high-spec rope but for those not seeking such extremes in their climbing it provides better value. Designed to be very hardwearing the Enduro fits the bill for 'day-cragging' and indoor use perfectly and with an new 30m length for smaller venues offers extra choice and value.

Features: BCC, DCC.

Weight: 760gms/26.81oz.

Product Code: 19WCROPE.

WC Infinity Rope Bag

FEATURES

USP – UNIQUE SHEATH PLAIT

This is the concept which gave Enduro ropes their name! By using a higher than normal percentage of sheath yarns we have created one of the most durable and damage resistant ropes ever built. Combining this with a yarn twist aligned along the axis of the rope for handling we feel that this feature makes for a solid reliable 'best in class' rope.

BCC – BALANCED CORE CONCEPT

Choosing the right core construction makes a huge amount of difference to rope behaviour. Our yarns are twisted and heat treated in house and then selected to provide a core strand construction specific to each rope diameter. Perfecting this 'balance' for all our styles has been testing, but the effect is obvious as we deliver a solid, perfectly round rope which feels and handle great from day one.

DCC – DURA-CORE CONSTRUCTION

A "marine finish" lubricant is applied to the core which changes the way it interacts with the sheath, increasing the dynamic properties of the finished rope as well as significantly aiding longevity.

SD – SUPER DRY TREATMENT

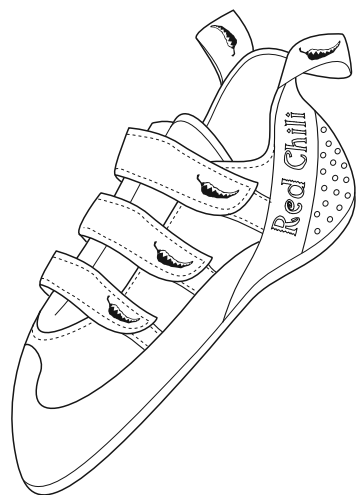

A wet rope may hold less than 50% of the falls held when dry. Complete immersion of the rope in the hydrophilic, silicone based solution and subsequent heat setting ensures the best possible protection against water absorption. Super dry treatment is an important contributor to rope safety and performance, therefore all Infinity Ropes are offered with the choice of a Super Dry treatment.

SPIRIT IMPACT ZONE LACE

SPIRIT

SAUSALITO

DURANGO

DURANGO VCR

NEW MATADOR VCR

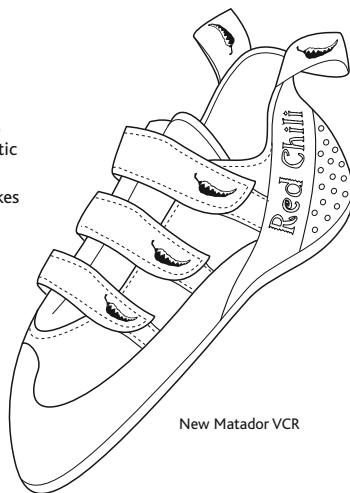

No More Bull! The Matador is super sharp. And with our hottest level of performance and a wicked style it's the new weapon on the bouldering frontline.

Tweaked to deliver ultimate awareness, a slimmer last and toe down design combine to push power through the front of the shoe – giving maximum grip, feel and feedback on the smallest smears and edges. Externally, a new, synthetic upper resists stretch better, and the triple VCR straps keep a firm grip on the foot to contain and control this potent package. A snug, precise spilt-heel makes for better hooking and completes the package.

Styled for the wild and signalling a new avenue for Chili's top end range this is a shoe for the hardcore to try more, fight harder and win battles in this unstoppable grade war we're all committed to!

- Toe down design for power.
- New Synthetic upper for lower stretch.
- Triple VCR straps for control.
- Super sharp toe profile.
- Super cool new designer upper.
- Red Chili 4.2 RX1 rubber.
- Twin pull on tabs.
- Split Heel for better hooking.

Product Codes: 50RCMTDVCR03 – 50RCMTDVCR12.

New Matador VCR

CORONA VCR

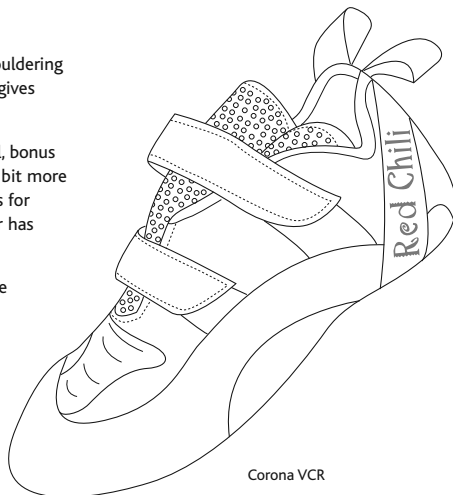

The Corona VCR offers another choice of VCR for sports, routing or bouldering but using a different last, midsole and upper from the new Diavolo it gives a well tested & valid alternative.

All the performance features are here: sharp low-profile toe, snug heel, bonus rubber for super-tech hooking, and a supportive mid-sole that gives a bit more oomph to the shoe when it's needed. VCR straps give easy on and offs for repoints, belays and bouldering and the stylish black and white outer has been a popular choice...

A top performer, the Corona VCR gives a proven precision performance that really works.

- VCR straps for easy adjustment.
- Sharp asymmetric low profile toe.
- Bonus rubber over the toe and in the arch for added versatility.
- Cool new black / white colourway.
- Twin rear pull on tabs.
- Super sticky 4.2mm RX1 Red Chili rubber.
- Sizes UK 3 to 12 / US 4 to 13.

Product Codes: 50RCCV03 – 50RCCV12.

Corona VCR

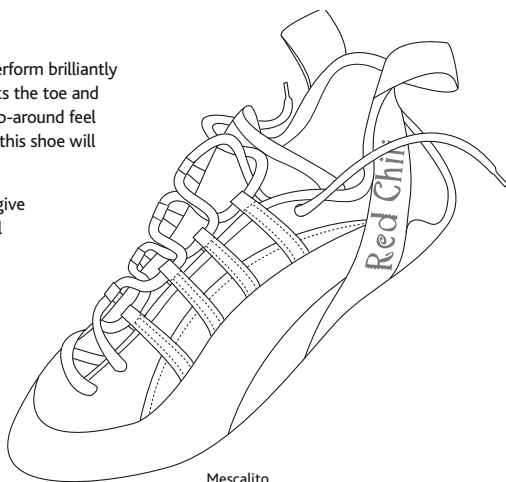

MESCALITO

A versatile, performance orientated shoe the Mescalito is designed to perform brilliantly across the widest spectrum of styles. A semi-asymmetric profile supports the toe and combines perfectly with a sculpted, speed-laced upper, to provide a wrap-around feel that fits more feet more easily. Laterally firm but with a responsive flex this shoe will edge with the best but is equally at home smearing on granite or grit.

Re-worked for 2009 the Mescalito has been sharpened at the toe to give more pocket power while the upper has been reinforced to give a real precision alternative across a range of disciplines.

- Easy and fast fitting speed laced upper.
- Low profile semi-asymmetric toe.
- New 'ultra-cup' heel.
- Graduated midsole – firm but responsive.
- Twin rear pull on tabs.
- Super sticky 4.2mm RX1 Red Chili rubber.
- Sizes UK 3 to 12 / US 4 to 13.

Product Codes: 50RCM03 – 50RCM12.

Mescalito

IMPACT ZONE HEEL

Red Chili's exclusive and innovative Impact Zone is a subtle, bonus layer of impact absorbing foam hidden in the heel of the shoe which gives a more cushioned landing when needed. So for bouldering indoors & out or just walking off the crag it's proved to be a mighty popular way of having a more comfortable day out without sacrificing performance.

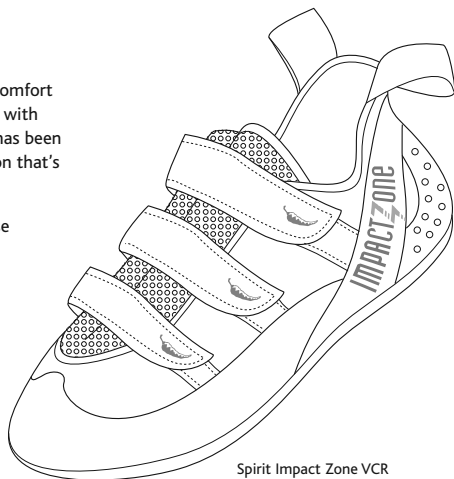

SPIRIT IMPACT ZONE VCR

A success from day one the Impact Zone VCR has carved a niche as a thoroughbred technical shoe. The tight, focused, toe and Impact Zone comfort of the heel combine to create a shoe built for bouldering and sport but with enough power and support for longer routes. This multi-featured shoe has been a bestselling model and offers an all-round performance, fit and function that's hard to match anywhere.

Stylish, easy to get on and off and technical – without being too intense to wear – the VCR is a winner.

- Impact Zone heel for comfort and performance.
- Triple VCR straps for easy and adaptable control.
- New sharper, lower toe profiling.
- Stylish modern design.
- Twin rear pull on tabs.
- Super sticky 4.2mm RX1 Red Chili rubber.
- Sizes UK 3 to 12 / US 4 to 13.

Product Codes: 50RCSPVIZL02 – 50RCSPVIZL08.

Spirit Impact Zone VCR

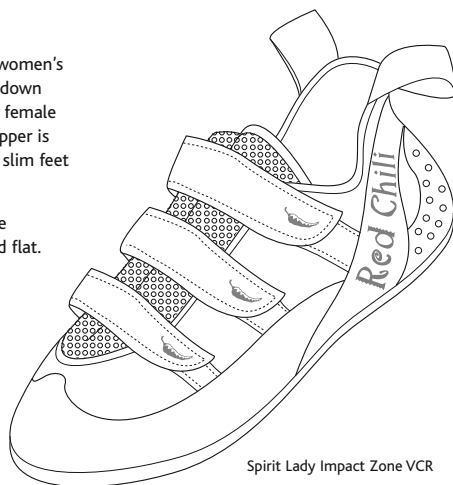

SPIRIT LADY IMPACT ZONE VCR

Stylish, sporty and technical and getting great reviews, Red Chili first women's specific shoe looks and feels the business. With a neat, light, trimmed down version of the best-selling Spirit last as its base and adapted to fit the female foot shape better – this looks a real winner. On top our triple velcro upper is great for quick on & offs and adjusts well for a precision fit – even on slim feet – while at the heel is a snug cup that should hook great.

A precision entry into the women's market that's sharp enough for the hardcore if worn tight but relaxed enough to take first steps in if fitted flat.

- Specifically designed for a women's foot.
- Impact Zone heel for comfort with performance.
- Triple VCR straps for easy adaptable control.
- Cool new colorway.
- Neat sharp low profile toe.
- Red Chili 4.2mm RX1 rubber.
- Sizes UK 2 to 8 / US 3 to 9.

Product Codes: 50RCSPVIZW02 – 50RCSPVIZW08.

Spirit Lady Impact Zone VCR

SPIRIT IMPACT ZONE LACE

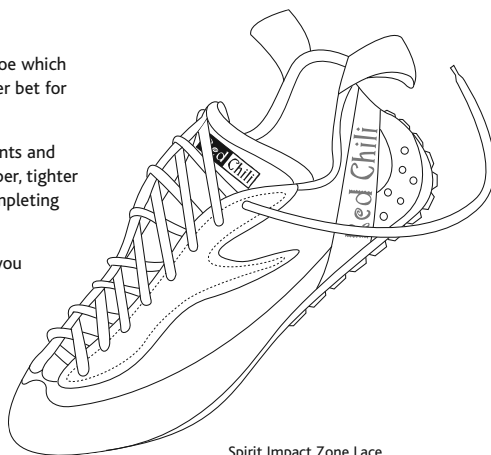

Boosted for the multi-pitch and mountain environment, this is a shoe which delivers functionality and fit in spades making it a stronger and safer bet for big days out.

A classic 'dot' sole now covers the heel gives to more bite for descents and longer days and creates even more comfort. Added to this is a sharper, tighter upper with a re-profiled toe and extra padding around the heel, completing a slick package.

A clever integrated design gets the most out of this shoe allowing you to do more in more places for longer. A real winner.

- New 'dot' sole under the heel for better grip for descents.
- Impact Zone heel for comfort with performance.
- New sharper, lower toe profiling.
- Re-worked heel – more padding + tighter.
- New midsole material for more touch and feel.
- Twin rear pull on tabs.
- Super sticky 4.2mm RX1 Red Chili rubber.
- Sizes UK 3 to 12 / US 4 to 13.

Product Codes: 50RCSPIZII03 – 50RCSPIZII12.

Spirit Impact Zone Lace

SPIRIT

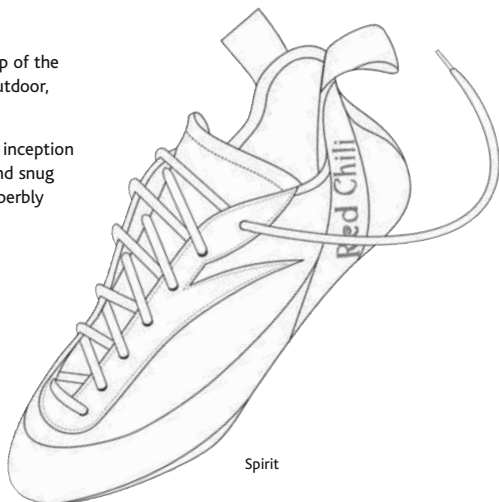

A certified classic, the Spirit is a neat, light shoe that puts fit at the top of the agenda, climbing beautifully across a wide spectrum of asks: indoor, outdoor, boulder, trad and sport.

The fastest selling shoe Red Chili ever made and ever present since its inception 5 years ago it has precise, glove like fit, low profile toe, defined arch and snug heel. And with long 'to the toe' lacing the Spirit just wraps the foot superbly giving a feel and feedback that's hard to beat.

Subtle, stylish and such a great fit, the Spirit continues to inspire good climbing as it has done from day one.

- New sharper, lower toe profiling.
- Re-worked heel – slimmer and tighter.
- New midsole material for more touch and feel.
- Twin rear pull on tabs.
- Super sticky 4.2mm RX1 Red Chili rubber.
- Sizes UK 2 to 12 / US 3 to 13.

Product Codes: 50RCSP03 – 50RCSP12.

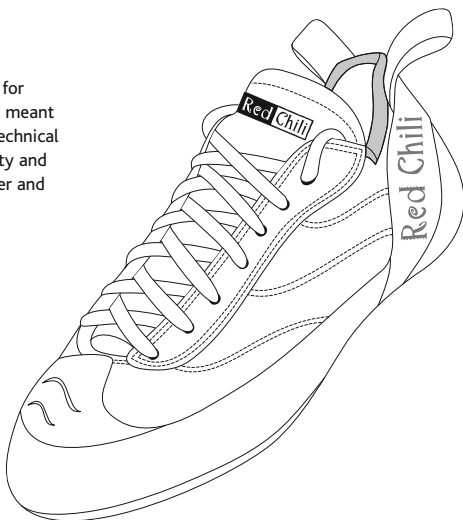

Spirit

SAUSALITO

The Sausalito is a great shoe and an excellent shoe for climbers of all levels – giving a stiff edge for those pushing it and a solid platform for beginners. The recent makeover has given the shoe a wider appeal and meant even more performance, while retaining the famous comfort and fit. Technical changes included a flexible rubber toe patch for extra support, longevity and added performance for crack-fans. Also, the two piece heel works better and wraps the heel for a high performance fit.

- Forgiving centre-asymmetric toe shape.
- Medium width, low volume last.
- New toe patch for longevity and performance.
- Fully lined to increase durability and wick perspiration.
- Lacing adapts to max no. of foot shapes.
- Super sticky new 5mm Red Chili 'RX 1' rubber.
- New two piece 'slingshot' heel for best fit.
- Graduated, supportive midsole.
- Twin pull on tabs.
- Size UK 3-15 / US 4-16 inc half sizes.

Product Codes: 50RCSRD03 – 50RCSRD15.

Sausalito

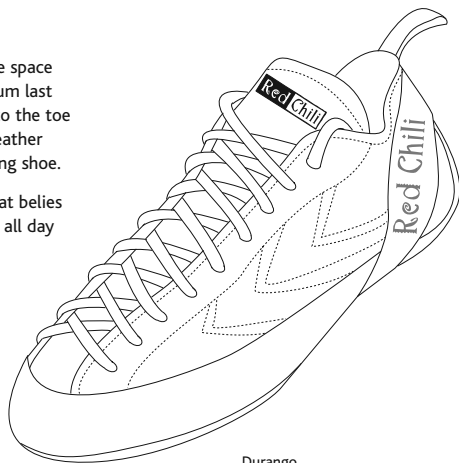

DURANGO

A 'bargain buy' bracket design, this is a simple starter shoe that fills the space once occupied by the souped up Sausalito. With a broad toe and medium last the Durango will suit a variety of foot shapes and longer lacing down to the toe means it adjusts easily creating a snug fit. Simply styled with a thick leather upper and 5mm sole, it has a supportive feel to make a solid long lasting shoe.

The Durango is confidence inspiring all-rounder with a performance that belies its remarkable comfort. A great starter boot that's equally at home for all day outdoor or indoor use.

- Full length toe lacing for maximum adjustment.
- Easy fit, broad, centre asymmetric last.
- Relaxed full rubber heel for comfortable support.
- Twin rear pull on tabs.
- Super sticky long lasting 5mm RX1 Red Chili rubber.
- Sizes UK 3 to 12 / US 4 to 13.

Product Codes: 50RCD03 – 50RCD12.

Durango

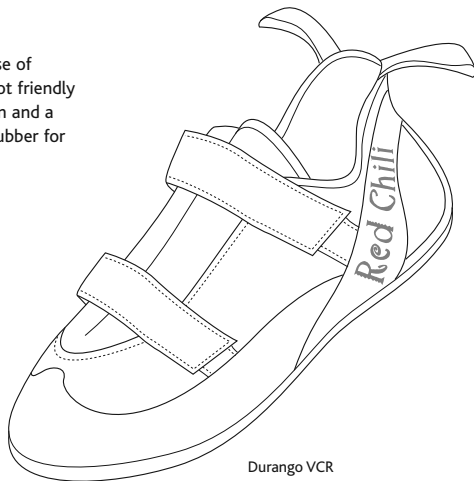

DURANGO VCR

A tweaked version of the lace up version, this VCR version adds an ease of entry and adjustability that should bring in even more fans. A firm, foot friendly shaped last gives a great platform for indoor, outdoor, or all day action and a simple slim heel holds firm too. Add a solid base of Red Chili's 5mm rubber for long lasting stick and it makes a great package for starting off...

This durable and solid all rounder is the perfect starter shoe and will be equally at home at the wall, outdoor and on multi-pitch routes.

- Double VCR straps for easy adaptable control.
- Easy all round last shape.
- Perfect starter shoe.
- Red Chili 5mm RX1 rubber.
- Sizes UK 3-12 US 4-13.

Product Codes: 50RCDVCR03 – 50RCDVCR12.

Durango VCR

SPLASHDOWN BOULDER MAT

Bigger, deeper, wider and more comfortable than most... the inimitably styled Red Chili mat is one of the beefiest on the market and has carved itself a niche with a combination of performance and price that's hard to beat. Re-assuringly thick, it has up to 1/3 more dual density foam making for a soft landing on even the biggest drops.

Features: Dual density foam, New easy-clip metal buckles, Removable 'rucksac' style harness, Choice of 3 designs.

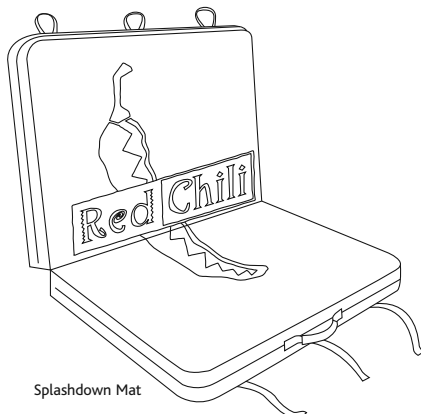

Size: 120cm x 90cm x 12cm. Weight 4.5 kg.

Product Codes:

Large logo: 48RCPADSPL.

Small Logo: 48RCPADSPSL.

Pirate: 48RCPADSPP.

Splashdown Mat

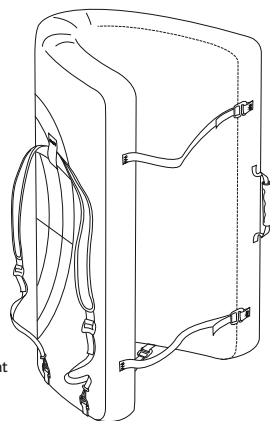

TACO BOULDER MAT

A lightweight model that works on a 'wrap-around' principle, this is a clever little pad that's designed to be used carry side up to keep your back clean on the carry out. The wrap also avoids a central crease to fall through and you can stuff your goodies inside for the hike in.

Features our new metal buckles for easy unclipping, a removable harness and a funky target pattern.

Size: 120cm x 102cm x 9cm. Weight 3.5 kg.

Product Code: 48RCPADTACO.

Taco Boulder Mat

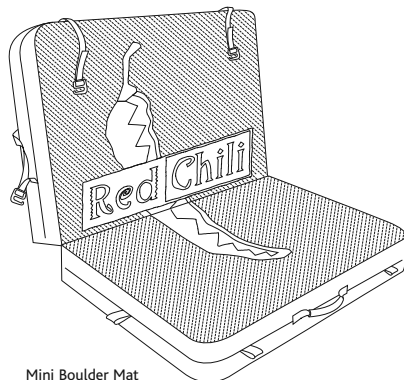

MINI BOULDER MAT

Take our 'Splashdown' pad and miniturize it for ease of carry storage and transport and you have the mini-pad. Same cool foam, same strapping and harness system and a neat little logo – a great way of saving the pennies at the same time as the ankles!!!

Features: Dual density foam, New easy-clip metal buckles, Removable 'rucksac' style harness.

Size: 102cm x 83cm x 9cm. Weight 2.75 kg.

Product Code: 48RCPADMINI.

Mini Boulder Mat

LOGO CHALK BAG

Our best seller, this classic bag comes in a variety of cool colours and our distinctive Red Chili logo. Comes with free belt.

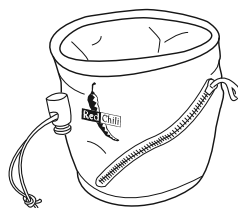

Product Code: 48CBRC.

CARGO BAG

A zip pouch on this larger bag gives room for a topo, power bar, keys or other bits and pieces for a long day out. Comes with free belt.

Product Code: 48CBRC.

LARGE LOGO CHALK BAG

A larger bag with a 'teardrop' shape gives easy access and slightly bigger capacity. Still has the same cool Red Chili design with either a Logo or Pirate embroidery and comes with a new toothbrush holder on the side. Comes with free belt.

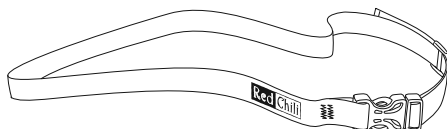

Product Code: 48CBLRC.

CHALK BAG BELT

A neat, 20mm webbing belt that fit Red Chili chalk bags perfectly. Simple adjustment through a fastex buckle.

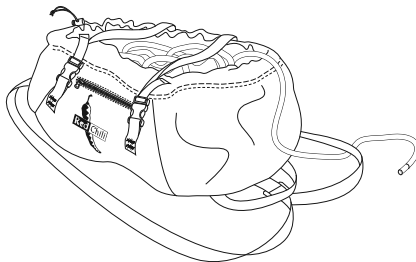

Product Code: 48CBB.

ROPE BAG

A simple classic design, with a roll out tarp and strong easy adjust fastex buckles, internal tie point and a simple backpack harness for ease of carrying.

Product Code: 48RBG – 48CRSK.

T-SHIRTS

Two funky styles, choose from the classic Red Chili logo or our popular Pirate patch. Available singly or in packs. Various colours: Black, White, Zinc, Sky, Ash, Bottle... Medium, Large, XL available.

VEST

Show off your buff body, work your tan or just look and keep cool in these logo vests. Black or Ash. Med, Large, XL.

KARABINERS – SUPER 10

Welcome to the new generation of Super 10's: bigger, with a more defined shape and a wider gate opening for easy clipping, as well as being better value, these new Cloggies are difficult to turn down.

CENTRE – THREADBACK / ZIPLOCK

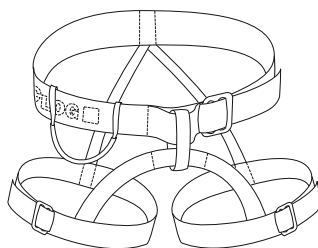

The Centre has proved extremely popular over the last few years as a basic no-frills introduction to a 'proper' tie-in climbing harness. As it's name suggests, it is ideal as a teaching or group harness especially where the emphasis is on best practice and correct climbing tie-in procedure. There are now two versions of this popular model being offered. The original with 'threadback' buckles and a new model with Clog's new 'ziplock' style buckles which are always threaded and are simply pulled to tighten.

Both models also come with a single gear loop.

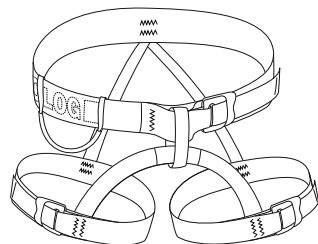

Features: High visibility belay loop, Colour defined leg loops, Leg loop identity labels, Huge size range per model.

PRODUCT	PRODUCT CODE	SIZE	WAIST cm	WAIST inch	LEGS cm	LEGS inch	WEIGHT gm	WEIGHT oz

All harnesses are 3 Sigma tested and CE to prEN12277, UIAA 105

Centre Threadback

Centre Ziplock

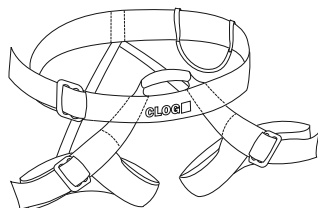

CLASSIC – THREADBACK / ZIPLOCK

Like the Centre the Classic is designed as a budget introductory harness with 44mm webbing throughout and large threadback buckles. An 'over-the-top' clip in point means this is a great group or centre product for quick changeovers using a screwgate while its 'nappy' style means it is adaptable as a winter walking/mountaineering product. There are now two versions of this popular model being offered. The original with 'threadback' buckles and a new model with Clog's new 'ziplock' style buckles which are always threaded and are simply pulled to tighten. Both models also come with a single gear loop.

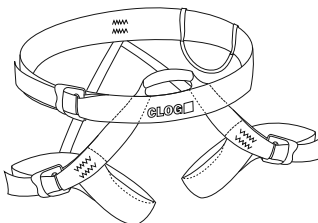

Features: High visibility clip in point, Leg loop identity labels, Huge size range per model, Single gear rack.

3σ THREE SIGMA

The Three Sigma Rating system is a method of Statistical Quality Control (SQC) which we use to describe, analyse, and control the rated strengths of our products. For each batch produced, a statistically representative sample is taken and tested to destruction in accordance with the relevant European Standard for that product and/or our own approved internal Quality Assurance Procedures.

These procedures are an integral part of our Quality Assurance System. From the data obtained from destruction testing, the average (or mean) and sample standard deviation (which is a measure of variance based upon the results obtained) is calculated. 3σ is three times the sample standard deviation. When 3σ is deducted from the mean result obtained, we can predict the spread of results which would be obtained if we were to destroy the entire batch (which is why we sample only!). We monitor this data closely from batch to batch to ensure that the rated strength (as marked on the product) is always less than the mean minus three times the sample standard deviation. This ensures that the minimum breaking strength for all products is consistently higher than the rated strength as marked on the product.

ISO9001:2000 QUALITY ASSURED FIRM

Wild Country is registered to International Standard ISO 9001:2000 (Certificate No. C/7545.Q/2678). This is the internationally-accepted model for Quality Assurance Management Systems, which has been adopted in over 150 countries worldwide.

UIAA SAFETY LABEL

The UIAA Safety Label can be awarded for mountaineering and climbing equipment that meets the requirements of the relevant UIAA standard. In order to prevent unnecessary multiplicity of standards, the UIAA standards are based on the European standards (EN standards, also called CEN standards). The EN standards, in turn, are based on the former UIAA standards, which were the first standards for mountaineering and climbing equipment in the world. The present UIAA standards may have higher and/or additional requirements above those in the EN standards.

CE CERTIFICATION

Where required by law (European Union Directive 89/686/EEC – for Personal Protective Equipment), Wild Country products are type examined, tested and certified.

The organisation responsible for our ISO 9001 Quality System and CE marking is Notified Body No. 0120 SGS UK Ltd (202b Worle Parkway, Weston Super Mare, BS22 6WA).

WARNING

In accordance with EU Directive 89/686/EC Wild Country Ltd. supplies detailed instructions with all its products and recommends that the user reads and understands these instructions before use.

If you are in doubt, require further advice or would like a copy of the instructions for any Wild Country product, you should contact us at the address printed in this Work Book. It is the user's responsibility at all times to ensure that he or she understands the correct and safe use of any equipment supplied by Wild Country Ltd., uses it only for the purposes for which it is designed and practises all proper safety procedures. The manufacturer or supplier will not accept any responsibility for damage, injury or death resulting from misuse.

GUARANTEES

Wild Country guarantees all of its products from new against defects in workmanship or materials, unless the product has been worn out, misused, or abused, as determined by our examination. Wild Country will repair or replace any product as appropriate.

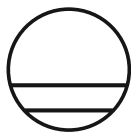

This guarantee is in addition to your statutory rights which remain unaffected. Wild Country Ltd. reserves the right to modify without notice the design and specifications of products described in this Work Book.

Wild Country Ltd. reserves the right to modify without notice the designs & specifications of products described in this Workbook. All weights, dimensions & sizing specifications where quoted are nominal.
